

PHOTOSYNTHESIS FOLDABLE

Name: _____ Date: _____

Directions: Cut out the parts of photosynthesis and match them where they belong.

Ingredients for Photosynthesis

Products from Photosynthesis

Water

CARBON
DIOXIDE

Water

CARBON
DIOXIDE

oxygen

GLUCOSE

oxygen

GLUCOSE

SUNLIGHT

CHLOROPHYLL

SUNLIGHT

CHLOROPHYLL

Photosynthesis can't begin without this energy source.

Sugar is the food that the plant uses.

Photosynthesis can't begin without this energy source.

Sugar is the food that the plant uses.

This green substance is where photosynthesis takes places in the leaves.

People breathe out this gas to help the photosynthesis process.

This green substance is where photosynthesis takes places in the leaves.

People breathe out this gas to help the photosynthesis process.

This gas that photosynthesis makes is important for humans to breathe.

This and nutrients are absorbed through the roots to help photosynthesis.

This gas that photosynthesis makes is important for humans to breathe.

This and nutrients are absorbed through the roots to help photosynthesis.

Photosynthesis can't begin without this energy source.

Sugar is the food that the plant uses.

Photosynthesis can't begin without this energy source.

Sugar is the food that the plant uses.

This green substance is where photosynthesis takes places in the leaves.

This gas that photosynthesis makes is important for humans to breathe.

This and nutrients are absorbed through the roots to help photosynthesis.

Photosynthesis FOLDABLE - ANSWER KEY

The order or placement of the ingredients and products shouldn't matter as long as they're sorted on the correct side.

Ingredients for Photosynthesis

Sunlight

Photosynthesis can't begin without this energy source.

Chlorophyll

This green substance is where photosynthesis takes place in the leaves.

Carbon Dioxide

People breathe out this gas to help the photosynthesis process.

Water

This and nutrients are absorbed through the roots to help photosynthesis.

Products from Photosynthesis

Glucose

Sugar is the food that the plant uses.

Oxygen

This gas that photosynthesis makes is important for humans to breathe.
