

SPEED

The rate of change of the position of an object.

$$S = D \div T$$

Measured in units of
m/s or km/h

TIME

A limited period or interval, as between two successive events.

$$T = D \div S$$

Measured in units of
Seconds (s)
or
Hours (h)

D

T

x

S

DISTANCE

The interval between two points of position.

$$D = T \times S$$

Measured in units of
Kilometers (km)
or
Meters (m)

Directions:

1. Print as a two-sided copy.
2. Cut out the entire triangle.
3. Fold exterior triangles inward toward the formula triangle: left, right, and then the bottom triangle up. This will show the speed triangle's cover.
4. Glue/Tape the back of the triangle down into your journal. Make sure the triangle is UPRIGHT! 😊
