

1. What are the reactants of photosynthesis?

2. What are the products of photosynthesis?

3. What are the reactants of the light-dependent reactions of photosynthesis?

4. What are the products of the light-dependent reactions of photosynthesis?

5. What are the reactants of the light-independent reactions of photosynthesis?

6. What are the products of the light-independent reactions of photosynthesis?

7. What are ATP and NADPH used for in Photosynthesis?

8. What two things do we need from photosynthesis in order to survive?

9. What do we provide to plants to help them survive?

10. Which part of photosynthesis needs sunlight?

11. Which part of photosynthesis does not need sunlight?

12. Which part of photosynthesis produces oxygen?

13. Which part of photosynthesis produces glucose?

14. What determined how many leaf disks floated in your photosynthesis cup?
